

Job Description

This form is used to provide a complete description of the specific job and defines the required skills, knowledge, behaviours, qualifications and experience.

Section A: Job Profile

The job profile provides key information relating to the salary and working conditions e.g. location of a job, along with the current focus of the role and a brief description of the main duties.

Job Details

Job Title:	Health Intelligence Analyst– Specialist to Advanced
Salary:	£39,168 - £46,464
Grade:	OCC Grade 11 to 12 (SCP 31 to 34* and 35 to 38)
Hours:	37 – We are open to discussions about flexible working
Team:	Public Health
Service Area:	Public Health
Primary Location:	The primary location is County Hall (Oxford) and you will be required to work from this location and work from home in an agile manner. It should be recognised that travel may be required and the post holder may be required to work at any establishment at any time throughout the duration of his/her contract, normally within Oxfordshire.
Budget responsibility:	£10,000
Responsible to:	Consultant in Public Health
Responsible for:	Project Officers

Job Purpose

This is a brief overview of the key objectives of the job. This post provides public health expertise for a broad portfolio of work programmes that aim to improve and protect the public's health and reduce health inequalities between individuals, groups and communities through co-ordinated system-wide action. The post holder will have responsibility for a range of technical, contextual and delivery functions that cover key areas of public health practice including:

- Use of public health intelligence to survey and assess a population's health and wellbeing.
- Assessing the evidence of effectiveness of interventions, programmes and services intended to improve the health or wellbeing of individuals or populations
- Policy and strategy development and implementation
- Leadership and collaborative working for health
- Health Improvement, Determinants of Health, and Health Communication
- Health Protection
- Health and Care Public Health
- Public Health Intelligence (Knowledge and Intelligence)
- Public Health Research and Development
- Service Improvement
- Ethically managing self, people and resources
- Providing flexible cross cover for other members of the public health team.

As a Senior to Advanced Health Intelligence Analyst, the role will be responsible for analysing, evaluating, and interpreting data from a range of sources, to inform the development of public health programmes, statutory reports and publications.

The role requires specialist knowledge of information data sets and coding classifications to identify and specify data and information requirements to support the development of outcome measures.

The role will require a comprehensive understanding of health data and data sources to be able to provide health intelligence advice to other members of the Public Health team, wider colleagues within the Council, and partner agencies (NHS, district councils, voluntary sector organisations).

The role will also lead on in-depth analytical projects to support others within the Public Health team.

This post holder is responsible for ensuring that all relevant County policies and procedures are adhered to and concerns are raised in accordance with these policies.

Job Responsibilities

This is a list of the main duties or tasks that the post holder will be expected to undertake.

Use of public health intelligence to survey and assess a population's health and wellbeing

- To provide, receive and analyse and interpret complex epidemiological and statistical data about the health of populations so that it can be reported to the Employing Authority and key stakeholders including the NHS, Local government and voluntary organisations.
- To facilitate the use of the best available evidence base to support the assessment of health needs, health inequalities, health impact assessment, health equity audit and the identification of priorities for public health action
- The development of reports and presentations in order to communicate complex public health information in a format suitable for varying audiences including professional partnership groups across a wide range of agencies, public meetings and the media, in situations where there may be barriers to understanding.
- Support the ongoing maintenance and development of local public health surveillance systems ensuring that local trends are monitored effectively.
- Use analytical skills to manipulate data to produce complex analysis of data and information for presentation to senior managers and external stakeholders.

Assessing the evidence of effectiveness of interventions, programmes and services intended to improve the health or wellbeing of individuals or populations

- To provide specialist public health advice to support and inform the delivery of high-quality evidence based public health programmes and services
- To develop monitoring and surveillance processes to assess the effectiveness of local public health programmes and services.
- To provide health intelligence and data support to monitor and evaluate local public health programmes and services
- To monitor budgets, be a cost centre manager and act according to the financial scheme of delegation.
- To maintain a specialist knowledge of the current public health evidence base for designated work areas

Policy and strategy development and implementation

- To interpret and implement national public health policy at a local level, ensuring relevance to the local population, within designated work areas.
- Provide health intelligence support to the development, implementation and evaluation of long-term multi-agency plans and strategies to achieve health gain for the local population based on identification of areas of potential health improvement, the diversity of local needs and the reduction of inequalities.
- Facilitate collaboration with partner organisations when consulting on key strategy developments and implementation plans.
- Contribute to public health policy development at a local or regional level through the provision of expert advice within specified work areas

Leadership and collaborative working for health

- Provide health intelligence support to colleagues across the organisation and other key partners.
- Work in partnership with statutory, non-statutory, voluntary and private sectors to promote effective collaborative working to achieve shared health improvement priorities.

- Actively develop the wider public health workforce to ensure shared priorities can be achieved. This may include supporting the development and delivery of specialist health intelligence training packages.
- Contribute specialist health intelligence knowledge, including interpreting and communicating key public health messages, to a wide range of audiences including councillors, health professionals and the general public.
- Support the development, implementation and evaluation of long-term public health plans and strategies, impacting on a range of community agencies and strategic partnerships to improve health and reduce local health inequalities
- Facilitate public involvement and consultation exercises on designated issues, promoting dialogue with community groups and working in partnership with public involvement leads.

Health Improvement, Determinants of Health, and Health Communication

- Provide health intelligence support to the commissioning of designated health improvement programmes, ensuring that they effectively target vulnerable groups to reduce local health inequalities
- Provide health intelligence expertise to ensure effective community involvement in developing and evaluating health improvement interventions at a local level

Health Protection

- Contribute to the organisational response to public health emergencies including communicable disease outbreaks and major incidents involving chemical, biological or radiological hazards
- Support the development and implementation of policies which protect the health of the population in relation to communicable disease and environmental hazards applicable to designated work areas.

Health Care Public Health

- To be able to support the improvement in the efficiency, effectiveness, safety, reliability, responsiveness and equity of health and care services through applying insights from multiple sources including formal research, health surveillance, needs analysis, service monitoring and evaluation.

Public Health Intelligence (Knowledge and Intelligence)

- Analyse, evaluate and interpret data and critically appraise research evidence from a range of sources to inform the development and review of public health interventions
- Compare, analyse and enable the development of options for addressing public health priorities
- Support the presentation and communication of public health data in a way that promotes understanding of complex issues, to a wide range of audiences influences decision-making and supports community engagement.
- Support the process of identifying robust health outcome measures to monitor and evaluation public health interventions
- Develop and maintain an appropriate level of technical skill in managing and manipulating public health information databases in relation to designated work areas

Research and Development

- Maintain an up-to-date specialist knowledge of appropriate research and policy to inform service developments for designated work areas
- Provide, receive and analyse and interpret complex information in various formats which involves seeking out, critically appraising and interpreting research evidence and statistics.
- Seek out, promote and implement evidence-based practice informed by current research
- Support the commissioning of public health research and audit of services in lead areas, including Health Equity Audits, Health Needs Assessments, Public Consultation and evaluative research surveys to inform the delivery of equitable and effective services.

Service Improvement

- Performance monitoring of public health services and programmes, to enable identification of areas of poor performance and the delivery of recovery plans to improve service outcomes
- Provide health intelligence support to the development of public health services and programmes to ensure the effective and fair targeting of resources.
- Provide health intelligence support for evidence-based commissioning and the prioritisation of health and social care services for the population in order to maximise health outcomes.
- Ensure that national service standards and guidance including NICE and National Service Frameworks are implemented within designated work areas.

Ethically managing self, people and resources

- Manage a varying and unpredictable workload to meet the needs of the Directorate
- May be required to line manage members of the team and / or project manage staff in other Directorates or Organisations. This may include supervising work, managing performance and leading on recruitment, selection, appraisal and staff development.
- Manage and monitor delegated public health budgets related to health intelligence work.
- Participate in continuing professional development in accordance with an agreed personal development plan.
- Deal effectively with conflict within the team and with partner organisations to gain and maintain good working relationships.
- Be an authorised signatory for selected Public Health Budgets.

Human Resources

- To support staff in developing an effective work/life balance.
- To be responsible for ensuring that own annual performance review in line with the OCC Policy is completed and that there is an up-to-date Personal Development Plan.
- To be responsible for own professional development and to participate in the organisational Performance Review Process.

Physical Skills, Physical Effort and Mental Effort

- To be competent in using a keyboard and IT packages.
- May be required to lift and move public health materials to public venues
- Concentration effort required in the development and analysis of public health reports.

Information

- To be responsible for maintaining the confidentiality of all patient and staff records in your area.
- To be responsible for ensuring that all staff within the department adheres to all areas of the Data Security Policy held.
- To be responsible for addressing all training needs of yourself and this should be done in line with organisational policy.

Code of Conduct

- Post holders are expected to comply with organisational schemes of delegation, standing financial instructions, policies, procedures and guidelines.

Equal Opportunities/Diversity

- The organisation is committed to an Equal Opportunities Policy which affirms that all staff should be afforded equality of treatment and opportunity in employment irrespective of sex, sexuality, age, marital status, ethnic origin or disability. All staff are required to observe this policy in their behaviour to their behaviour to other employees and service users.
